

What do we do?

We have the necessary knowledge and experience in our specialist-trained staff to ensure children with a sensory impairment receive a high quality education. This is achieved by providing a stimulating, friendly, supportive environment maximizing the full mainstream inclusion.

The team have access to the latest technologies including i-pads and laptops along with specialist software and equipment. Within the team we run an additional curriculum of BSL, SSE, Braille, touch typing/keyboard, mobility and a life skills programme. We liaise with teachers of the visually impaired, teachers of the hearing impaired and rehabilitation workers on a daily basis.

In addition to all of this, we offer sign language club and braille club to all of our pupils enabling us to enhance sensory impairment awareness across KS1 and KS2.
